

The living manual: read and watch at the same moment. Course manuals, technical books, learning videos and experience from training and support are being combined into one online manual – every function step by step, with process engineering background and the matching video exactly where you need it. Questions on a section go straight to our support.

Step by step

every function, with images from manual and book

Video in place

THE MANUALS

Manual	Content	Status
T1	AutoCAD P&ID – usage	prototype – with video course P&ID usage or course manual T1
T2	AutoCAD Plant 3D – usage	prototype – with video course Plant 3D usage or course manual T2
T3	P&ID / Plant 3D – setup	prototype – with configuration video courses or course manual T3
T4	Plant 3D – piping administration	prototype – with video course piping spec administration or course manual T4
T5 • T6	Navisworks • ReCap Pro	in preparation
T7 • T8	AutoCAD 2D/3D • Autodesk Inventor	in preparation
free	Tools • Using the website	public, no account

HOW A SECTION IS BUILT

1 Goal

what you can do afterwards

2 Steps

numbered, with command and dialog

3 Image + video

manual image and learning video in place

4 Background

process engineering, standards, practice

5 Question

straight to support

ACCESS

Free already

Online manuals **ASEING online tools** and **Using the website** – public, no customer account, with videos.

T1 to T4: prototype

With the matching video course or course manual you can already see the online manual as a prototype – we are trialling and improving it continuously. T5 to T8 (Navisworks, ReCap, AutoCAD, Inventor) are in preparation; separate access plans will follow – register your interest without obligation.
