

Productive right away instead of weeks of configuration. The Plant 3D standard configuration reflects the plant engineer's view only partially: symbols, tag definitions, validation options, layouts and suitable piping specs are missing – and get rebuilt for every client. Our templates bundle over 20 years of project experience in a predefined project you can start with immediately.

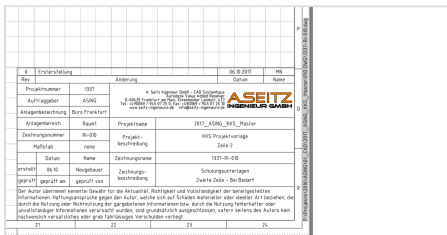

End-to-end from P&ID to 3D model

Plant identification to KKS, AKS or RDS-PP – flow diagrams to ISO 10628

WHAT THE TEMPLATES CONTAIN

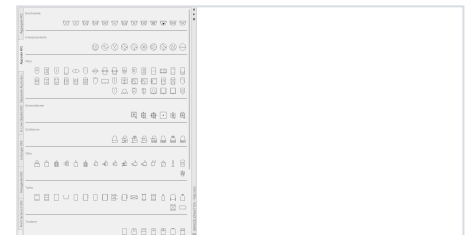

- Numbering systems:** ISO 10628, AKS, KKS, RDS-PP – with level system, pick lists and transfer rules
- Tags & annotation:** same tag structure in P&ID and 3D, KKS line flag, annotation with frame
- Title block to EN ISO 7200:** as annotation element, revisions as symbols
- Symbol palettes:** equipment, machinery, I&C, inline objects, lines by medium, fail-safe position
- Piping specs:** sample specs for steel, enameled, DIN 2873 – with weights and order texts
- Isometric & ortho:** Check, Final, Spool, Stress styles (A1–A3) and ortho templates
- Report Creator:** 15 reports – material, weight and center-of-gravity lists, line, valve and equipment lists
- Project control:** P&ID ↔ 3D comparison, project comparison, ready-made tool palettes and DWT

Title block to EN ISO 7200 with revisions

PRICES

ASEING PlantConfig Pro – company license from €2,490 net, plus VAT, one-time

	standalone	with PlantPlus
S up to 3 users	€2,490	€2,990
M 4 – 10 users	€3,490	€4,690
L 11+ users	€4,990	€7,590

- Complete AKZ template + all sub-templates (Basic, AKS, KKS, RDS-PP, topic templates), palettes, DWT
- Installer with automatic path adjustment, installation support and introduction
- Layout customization of title block/logo for P&ID, ortho, isometric and Report Creator

Single templates on request

One engineering configuration (Basic, AKS, KKS or RDS-PP) or one topic template (Valves & Equipment, Actuators & Fail-Safe Position, Pipe Segments, Title Block).

Preconfiguration and customization: piping specs and catalogs to your requirements, calculation of your piping specs, adapting the templates to your numbering and revision rules up to programming your own tools, training as an Autodesk Authorized Training Center. To go with it: ASEING Piping Catalogs from €350 and ASEING PlantPlus with around 100 additional Plant 3D commands from €990.
