

Project Support for Plant Design and CAD

Plant 3D in live projects – single phases or long-term, remote or on site

Task & goal

- ▶ Plant 3D in a running project – without standstill.
- ▶ You want to master peak loads, special tasks and new standards in the project.
- ▶ You want reinforcements to contribute right away.

Our solution

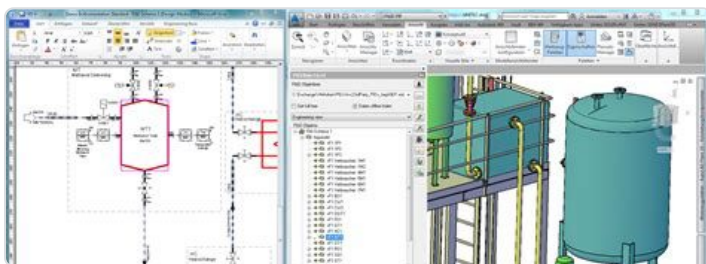

- ▶ Set up the project, implement standards, work along – remote or on site.
- ▶ Users who know the software inside out.

Your advantage

- ▶ **Time saved:** Meet deadlines despite peaks.
- ▶ **Competitive edge:** Special know-how exactly when needed.
- ▶ **Simpler:** One contact for software and application.
- ▶ **Added value:** Knowledge stays documented in the project.

Extra capacity that knows the software from the inside. We set up your Plant 3D project, implement standards and work alongside your team – as users who design plants with AutoCAD Plant 3D and P&ID ourselves. For project peaks, staff shortages or the move away from a legacy system: single phases or long-term in your team, remote or on site.

From P&ID to 3D model – project, tagging and catalogs from one source

A model to hold – 3D print from the plant model for reviews

short • long

by project phase, without new hires

remote • on site

via Teams and remote access or at your site

since 2002

software and application for AutoCAD Plant 3D

1 working day

until we reply to your enquiry

WHAT WE TAKE ON

CAD design & plant layout

Equipment layout, piping and steel structure design in Plant 3D

Piping specs & piping design

Create specs, route lines, generate isometrics

Plant 3D projects

Set up the project, implement standards, coach the team

Bottlenecks & peaks

Extra capacity without new hires or long onboarding

Coordination & as-built data

Project coordination, data management, documentation, laser scanning

Migration & rollout

Move from legacy systems, network and workgroup structures

HOW IT WORKS

1 Enquiry

task, scope, deadline

2 Alignment

standards, data, access

3 Delivery

remote or on site

4 Handover

data and documentation go to you

YOUR BENEFITS

- ▶ **Flexible resources:** fast help with staff shortages
- ▶ **No long onboarding:** support you can use right away
- ▶ **Transparent:** our methods in the Infobase, work aids and technical books

- ▶ **Expertise:** specialists in CAD, plant design and process engineering
- ▶ **Your data:** project data stays yours – complete handover
- ▶ **Across industries:** chemicals, pharma, energy, food, water

Terms

Quotation based on task, scope and deadline – time and material or a fixed price for clearly defined packages. Accompanying support via Teams as a block of hours (12 months):

Block of 10 hours

€1,750

Block of 20 hours

€3,400

Free CAD check

45 minutes via remote access: we look at your project and tell you where support pays off most.
