

Software for Plant Engineering, BIM and Existing Plants

Autodesk products and extensions – with advice, rollout, training and support

Task & goal

- ▶ The right software for plant design, BIM and as-built – introduced and used.
- ▶ You want to use your licenses productively from day one.
- ▶ You want to use all features – with the right training and configuration.

Our solution

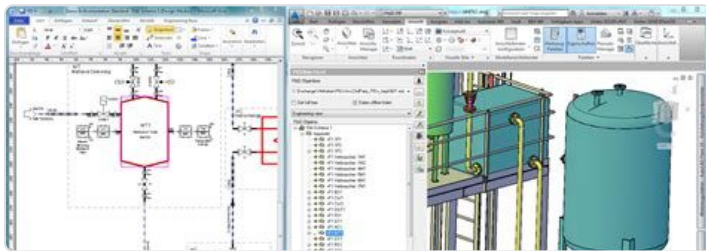

- ▶ Autodesk products and specialized extensions.
- ▶ Advice, rollout, training and support from one source.

Your advantage

- ▶ **Time saved:** Productive sooner after purchase.
- ▶ **Competitive edge:** Software that fits plant design.
- ▶ **Simpler:** One contact.
- ▶ **Added value:** Extensions such as PlantPlus and PlantConfig Pro.

The right software for each discipline – and everything it takes to work in the project. We advise on Autodesk products and specialized extensions, set them up and train users and administrators. Our approach leads from the discipline to the software to the training: basics in the Plant Engineering Infobase, dates in the training calendar, in-depth learning with video courses and technical books.

AutoCAD P&ID and Plant 3D – flow diagram and 3D plant in one project

ReCap Pro and EdgeWise – from scan to model

AUTODESK PRODUCTS

AutoCAD with the Plant 3D and P&ID toolset

not sold separately – included as a toolset in AutoCAD:
P&ID, piping, equipment, steel, iso and ortho in one project

AutoCAD – further toolsets

2D/3D basis – Mechanical, Electrical, MEP, Map 3D

Navisworks

combine models, clash detection, 4D sequencing

ReCap Pro

register laser scans, prepare point clouds

Revit

BIM for buildings and building services

Advance Steel

3D steel, shop drawings, NC data

Inventor · Vault

equipment, special parts, data and release management

Construction Cloud

common data environment, model coordination in the cloud

Civil 3D · InfraWorks · Map 3D

site, infrastructure, utility networks, GIS

SPECIALIZED EXTENSIONS

auxalia PlantTools

PlantDataManager, PlantExpressTools, PlantLink,
PlantReporter, PlantSpecDriven, PlantSync – data, reports,
Excel/ERP

EdgeWise – Scan-to-BIM

automatic extraction of piping and structures from point
clouds, handover to Plant 3D and Revit

Firequest – fire protection

fire brigade plans DIN 14095, escape plans DIN ISO 23601,
fire brigade route cards DIN 14675-1

OUR SERVICE AROUND THE SOFTWARE

1 Advice

find the right solution per discipline

2 Installation

setup and integration

3 Training

users and administrators

4 Support

fast help via remote access

ASEING for Plant 3D – company license

ASEING PlantConfig Pro – project templates **from €2,490**
ASEING PlantPlus – command extension **from €990**
Software package PlantConfig Pro + PlantPlus **from €2,990**
All-in-One mega package – software, all catalogs, online manuals, video courses, books **from €8,290**
Tiered by number of Plant 3D users in the company · 12 months' access incl. new versions – you may keep using downloaded files afterwards · Title block and logo layout adaptation is included in PlantConfig Pro; further setup, adaptation to your numbering and onboarding are booked as a service – by effort via support (Teams).

Autodesk licenses

Sold through our partner – quotation on request, ideally together with rollout and training. Customers with an Autodesk subscription via Contelos-Seitz receive an additional 10% discount on packages (not on services) – tick it in the shopping cart; we check eligibility before activation.
