

Video Courses & Technical Literature

Self-paced learning with plant engineering know-how – any time, at your own pace, without a trainer

- Task & goal**

 - ▶ The answer exactly when the question arises in the project.
 - ▶ You want to land at the right spot in the video right away.
 - ▶ You want explanation and workflow together.
- Our solution**

 - ▶ Lessons available individually, with search.
 - ▶ Matching handouts and online manuals.
- Your advantage**

 - ▶ **Time saved:** Answers in minutes instead of searching.
 - ▶ **Competitive edge:** The team works independently.
 - ▶ **Simpler:** One place for everything.
 - ▶ **Added value:** Knowledge stays available.

Knowledge needed in the project – when you need it. Our video courses show every work step on screen; the specialist books and course manuals deepen it for reference.

8 video courses

348 Video lessons

8 Technical books (PDF)

10 Course manuals

12 months Access to all online offerings

VIDEO COURSES – LESSON BY LESSON ON SCREEN

Video course	Level	Who it is for · Goal	Lessons	Topic package
P&ID Application	Basics	Create a project; place, tag, check and output equipment, lines and valves.	56	T1 · 159 €
P&ID Configuration	Advanced	Configure the project structure, properties, tag formats, annotations, symbols, title block and reports.	100	T3 · 318 €
Plant 3D Application	Basics	Model steel structures, equipment and piping – including grips, routing, slope and P&ID validation.	64	T2 · 299 €
Plant 3D Project Configuration	Advanced	Configure project structure, properties, tag formats, P&ID object mapping, layers, connections and pipe bending.	35	T3 · 318 €
Plant 3D Isometrics	Advanced	Set up the isometric template, iso style, title block, print settings, annotations, dimensions and iso symbols (SKEY).	24	T4 · 456 €
Plant 3D Ortho	Advanced	Ortho DWG settings, title block, print settings, title block queries, layout and layers of the ortho template.	6	T4 · 456 €
Plant 3D Report Creator	Advanced	Create 2D and 3D reports, filter and sort queries, design report layouts.	23	T4 · 456 €
Plant 3D Spec Administration	Advanced	Build piping specs and catalogs, create components, master long descriptions and bolt sets.	40	T4 · 456 €

Video courses are available in the topic package with online manual and course manual, 1 year of access – watch all lessons as often as you like, with search and progress display.

TECHNICAL BOOKS (PDF)

- ▶ **AutoCAD P&ID (1) · €59**
AutoCAD P&ID handbook
- ▶ **AutoCAD Plant 3D (3) · €49**
Database Management; Report Creator; Isometric Creation
- ▶ **Special topics (4) · €49**
support concepts; Ortho DWG; screwed fittings; cable trays

12 months of access incl. new versions – you may keep using downloaded files afterwards. The scripting book includes the script catalogs.

COURSE MANUALS

AutoCAD 2D and 3D · AutoCAD P&ID Application · AutoCAD Plant 3D Application · P&ID / Plant 3D Setup · Plant 3D Administration · Autodesk Advance Steel · Autodesk ReCap Pro · Autodesk Navisworks · Inventor – basic and advanced course · EdgeWise

Companion manuals of our training courses – each in the matching topic package (online manual + course manual); included with every training course where available for the module.

PACKAGES – WITHOUT A TRAINER, 12 MONTHS

Complete package online manuals
€1,290 company license
All online manuals with video courses (348 lessons) and course manuals + all 8 technical books

Topic package
from €49
T1 €159 · T2 €299 · T3 €318 · T4 €456 · further topics from €49

Mega package
from €8,290
Complete package online manuals + all catalogs, PlantConfig Pro, PlantPlus · tier by users: S €8,290 · M €12,490 · L €16,590

With training
3 months free
matching topic package (online manual + course manual)

Company license by number of users: prices for up to 3 users (S) · 4–10 users ×1.5 (M) · 11 users or more ×2 (L).

HOW ACCESS WORKS

- 1 Choose**
Order a package or book online
- 2 Activation**
Access via your customer account
- 3 Learn**
Watch videos, download books
- 4 Deepen**
Training, support or workshop
